Roket Cyano Glue Gel
Cyanoacrylate Gel
20ml
Sold By Each

A high strength cyano glue
that does not run and is ideal for gap filling.
Bonds: wood, plastic, metal, card, rubber etc.
The metal tube extends shelf life.

Cyanoacrylate Adhesive Additives

Tricky Stick DAC17 50ml

Allows cyano to bond difficult plastics, rubber and foam including polypropylene, nylon, vinyl and silicone rubber. Increases the versatility of cyano as a glue and improves adhesive strength.

Fig 1. Simply brush Tricky Stick onto surfaces.

Fig 2. Apply your favourite cyano glue (Roket).

Fig 3. Quickly bring surfaces together until set.

Strengthens EPP foam joints

Useful products for use with the Roket cyano range

Roket Blaster

DAD17 50ml spray bottle
DAD59 250ml top up bottle

Spray which permits Roket CA (AD43-46) to bond difficult surfaces and accelerate the cure. Pre-condition surfaces and then apply Roket CA (AD43-46) for instant bond.

Roket Re-cap

DAC16

Replacement Roket superglue tips and caps that make your glue flow as new! Pack of 3 easily fitted replacement tips and caps.

Roket Re-cap re tips, refreshes and restores your bottle. Pack contains two Roket CA tips and caps, one Super'Phatic! Roket Card glue, and one spare micro-tip. The best glue accessory ever!

Glue Buster

DAD48 28g

Debonder and dissolver of superglue. Releases bonded skin and removes superglue stains. Stays on site for faster debonding action.

Roket Powder

DAD18 40g

Strengthening powder for use with thin cyano adhesives to improve gap filling and toughness. Flows like liquid into spaces to take exact shape. Use for filling gaps where strength is needed. Sets in seconds with Roket Hot (AD43) or Rapid (AD44) cyano; can be filed, drilled and tapped.

Roket Glue Tips

DAC20

Precision, fine glue lines. Instant fit - Anti clog - No mess.

One piece glue tips for the accurate application of Deluxe Materials glues: Roket cyano, Roket Card, Super'Phatic! glue. Tips can be shortened or stretched for finer application.

Micro Tips & Tube

DAC09

Pack of six micro tips and PTFE tubing for precise anti-clog application of Roket CA glues (AD43-46).

Epoxy Resin Adhesives

Speed Epoxy II 3.5 tonne / 60 min set

DAD71

NEW

This new addition to the **Speed Epoxy II** range has been tested to over 3.5 tonnes (8,412 psi/ 58N/mm²) and sets a new standard for high strength epoxy glues, outdating many others. Like its companions, 4min and 20min grades, it sets hard, clear & sandable. This new formulation uses epoxy resin and hardener systems carefully matched to give high strength across gaps at 1:1 ratio, and yet tolerates slight mixing errors.

Tensile strength-tons/sq in
SPEED EPOXY II variants

A range of high strength, rapid setting, epoxy glues that are formulated to set hard, clear and sandable, and tolerate mixing ratio errors. Packed in attractive boxes, each bottle has a new 'witches hat' free flowing nozzle with coloured over-caps. Available in 4min, 20min, and 60 minute setting times in a selected range of sizes: 224g, 71g and 28g (see below).

Speed Epoxy II 4 min
28g twin tube

DAD67

Speed Epoxy II 4 min
28g syringe

DAD73

AERO T<CH range

Specially formulated epoxy for bonding composite mouldings.

AERO T<CH Epoxy Syringe

DAD63 25ml

Non-drip, strong visible joints, 24 hour set. Syringe dispenses epoxy resin and hardener in equal parts and needs to be mixed thoroughly. **AERO T<CH** fills gaps and forms visible fillets for the highest possible joint strength. Ideal for formers, engine and undercarriage mounts, servo mounts and bulkheads. Bonds: epoxy GRP, carbon fibre, aluminium alloy, ply and hardwood etc. 25ml twin syringe.

Recommended by:

AERO T<CH Epoxy Cartridge

DAD64 50ml

Formulated epoxy for bonding composite mouldings. Non-drip. Use with **AERO T<CH** dispenser gun and mixing nozzle. Ideal for formers, engine and undercarriage mounts, servo mounts and bulkheads. Gels in 3-4 hours, full cure in 24hrs. Mixed adhesive may be stored in freezer for 1-2 hours and re-used. **AERO T<CH** epoxy bonds: epoxy GRP, carbon fibre, aluminium alloy, ply and hardwood etc. 50ml cartridge for use in **AERO T<CH** dispenser.

AERO T<CH auto mix nozzles

DAC14

Specially designed mixing nozzles for **AERO T<CH** cartridge. Pack of 5 mixing nozzles for use with **AERO T<CH** epoxy syringe ensuring thorough mixing and maximum strength.

Various Adhesives

Super'Phatic!

DAD21 50ml

The thin, non-fuming alternative to cyano.

- Low odour, water clean up.
- Penetrates much further than other glues.
- Provides non brittle joints on balsa, ply, GRP, plastic hinges, foam and carbon fibre.

Recommended by: 

Pin & glue balsa & hardwood **Bonds plastic hinges** **Bonds carbon fibre & foam**

Cover Grip

DAD22 150ml

Heat sensitive adhesive for increasing the adhesion of plastic covering films (even aluminium foil) and trim to balsa and ply surfaces. Ideal for hard working areas eg. engine bays.

Speed Bond

DAD10 112g
DAD11 500g

Special modelling PVA glue that contains no fillers. Has unique solvent chemistry for faster drying and is superior to many DIY PVA glues.

Recommended by: 

Aliphatic Resin

DAD08 112g
DAD09 500g

Famous "yellow" wood glue used in aeromodelling and professional applications where hard woods are used; dries crisper than PVA giving better sanding specially with balsawood. Will not pull joints as it sets, resulting in better dimensional stability important for airframe construction. Also sets at low temperatures and is water resistant making it ideal for model boats. Use in miniature furniture making where its useful properties include:

- Taking a stain.
- Faster grab time.

Recommended by: 

Fusion

DAD19 75ml

Strongest acrylic adhesive for combinations of GRP, metal and wood and nearly all plastics such as ABS, PVC, styrene, acetate, acrylic.

Perfect mixing consistency

The only adhesive for critical joints, broken engine mounts, ball joints

Super Crylic!

DAD23 60g

Tough, problem solving adhesive for models where high impact plastics (eg. ABS) need to be bonded to wood, metal and GRP etc. Ideal for:

- Wooden engine bearers.
- Plastic cowling repairs.

Low viscosity allows use with light glass cloth. Ideal where epoxy or cyano does not work. Model boat:

- Fixing propshafts and rudders inside boat hulls.
- Repairs to plastic hulls. 60g twin pack.

Plastic Adhesives

Plastic Kit Glue

DAD70 70ml

A very fast, plastic cement for all types of plastic kits. The clog-resistant formula and fine tip bottle make for great ease of use.

Bonds: styrene, clear plastic, and even wood to plastic.

Plastic Magic

DAD24 50ml

Bonds plastics other glues cannot: Deluxe Materials **Plastic Magic** is a liquid solvent glue that produces **invisible glue lines**. The new safer formula can be applied with the Deluxe Materials **Pin Flow** solvent glue applicator (AC11) or conventionally with a fine paint brush. **Plastic Magic** bonds nearly all commonly used modelling plastics including polyester, acrylic, styrene, ABS, PVC, butyrate, and polycarbonate.

	Polyester	Styrene	ABS	Acrylic	PVC	Butyrate	Polycarbonate

Plastic Kit Glue	5-10	No	Yes	Yes	Yes	No	N/A	Yes
Roket Hot, Roket Max	1-20		No	Yes	Yes (Max)	No	N/A	Yes
Roket Odourless	10-20		No	Yes	Yes	Yes	N/A	Yes
Glue 'n' Glaze	60mins		Yes	Yes	Yes	Best	Yes	Yes

Roket Plastic Glue

DAD62 30ml

Liquid plastic cement. Non-toxic, non-flammable, low odour and fine non-clog tip that gives invisible glue lines. Can also be applied with brush, or **Micro Tips and Tube** (AC9).

Bonds in 8-10 secs and builds strength. Bonds: styrene, polyester, butyrate and plastic card. Water washable.

Glue 'n' Glaze

DAD55 50ml

For glazing and bonding crystal clear windows and canopies. A liquid plastic film-forming polymer which bonds most plastics and dries to crystal clear film.

It is ideal for miniature windows OO gauge or up to 6mm across. It will not smear or fog clear plastics. Ideal for scale aircraft, plastic canopies and glazing dollshouses. Easy water clean up. Bonds plastic.

Various Adhesives

Tacky Wax

DAD29 28g

Wax adhesive for holding miniatures in place whilst allowing re-positioning.
Many other uses eg. carrying small screws.

R/C Modellers Canopy Glue DAD12 112g

Multi-purpose gap filling canopy glue. Thick and tacky, dries clear, remains flexible. Bonds combinations of wood, plastic, fabric, foil, painted surfaces. Ideal for:

- Aeroplane canopies.
- Model boat plastic windows.
- Sealing gaps and small holes.
- Repairing tears in covering film.
- Application of rivets on scale models.

Dolls House Tacky Glue DAD27 112g

Very sticky glue which dries clear, flexible, and is non-staining. Use for:

- Bonding fabric.
- Plastic windows.
- Flower making.
- Bonding ceramic or flexible tiles.

Superior to other tacky glues in that it dries clear and bonds plastics, varnish and paint.

Foam 2 Foam DAD34 50ml

For rapid foam modelling. Very high tack glue. Strong hold, allows adjustment. Dries clear and flexible. Ideal for foam model aircraft.
Bonds: Depron, white, blue and EPO foams, wood and plastic. Also an excellent fabric glue.

Decorator Glue DAD26 112g

Thick glue, which, like Tacky Glue dries clear overnight. It has instant stronger hold round corners and on vertical surfaces whilst also allowing repositioning. Bonds fabric, leather, silk, paper, wood, glass, plastic, metal, painted and varnished surfaces.

Wallpaper Paste DAD32 112g

Ready-mixed paste that dries clear. It is non staining and does not attack copper wires or tape.

Ballast & Scatter Adhesives

Ballast Magic Kit

DAD76

NEW

Kit contains **Ballast Magic** (125ml), **Ballast Spray**, fine misting spray bottle, and handy mixing accessories. A new innovative product for ballasting track.

Will not harden cork and is especially useful when ballasting around points as it can be applied in a controlled manner without the risk of a liquid adhesive flowing into the working parts of a point. This adhesive is very versatile and can also be used to fix down scatter materials, piles of coal and may be removed with warm water if you wish to reposition track.

WATCH THE VIDEO

See page 13

Ballast Magic

DAD74 125ml

NEW

Innovative powder adhesive.

For clean, easy bonding of scatter & ballast. Instant grab, adjustable bond, reversible joints. A new way to ballast track in all scales. The adhesive itself is a fine dry powder that is very easy to mix in with ballast. Bond is reversible with warm water.

WATCH THE VIDEO

- Fast drying 1-2 hours.
 - Safe to use.
 - Good bond resistant to everyday handling
 - Can be manipulated easily & mixed with most scatters.
 - Ideal for large areas, fixing coal, creating piles etc.
- Covers 1 - 1.5 sq m.

Roket Card Glue

DAD57 50ml

For fast assembly of card models eg. railway buildings and rockets. Also bonds balsa wood, paper and card to most plastics.

Use sparingly, align and press parts together for instant bond. Water clean up.

Recommended by:

SUPERQUICK

www.superquick.co.uk

METCALFE

www.metcalfe-models.com

Ballast Bond

DAD75 100ml

Liquid adhesive.

- For easy bonding of railway ballast & scatters.
- Ready to use. Rapid spreading. Clear matt finish. Super thin, ready mixed adhesive for bonding railroad ballast, coal and other granular materials used in scale landscape modelling. Low viscosity & capillary action ensures rapid, efficient spreading with fast drying.

NEW

Instant wetting and spreading action

WATCH THE VIDEO

- Instant wetting & spreading action.
- Application does not disturb the ballast.
- Safe to use.
- Efficient for large areas, fixing coal etc, creating piles etc.
- Non-greening & biocide protected.

Scatter Grip

DAD25 150ml

Special adhesive which dries tacky allowing plenty of working time for bonding scatter materials. Ideal for railway layouts, gardens, dolls house scenery.

Scenic Spray Glue

DAD54 100ml

Spray glue for the attachment of scenic materials, eg. scatter to trees or baseboards etc. Non-staining. Dries clear and tacky. Gentle spray action.

Scenics

Create and Shape

DBD60 240ml

A lightweight, non-sagging scenic modelling material for the creation and casting of realistic diorama groundwork. **Create and Shape** can be moulded and smoothed with a soft wet brush before it is completely dry. It dries without cracking to a material with great structural integrity, bonding wood, plaster, plastic, foam etc. It can be cut, sawn and filed to shape when dry without crumbling like other products and then glued and coloured with acrylic for beautiful scenic effects. Ideal for repairs and special scenic projects where strength and durability is required.

Scenic Snowflakes

DBD25 500ml

500ml shaker pack. For the creation of dramatic snow scenes in minutes. Allows you to easily create real snow effects such as newly fallen, melted, slipped and frozen, on houses, trees and vegetation. **Scenic Snowflakes** are different from other snow because they allow you to add the detailed snow effects that will distinguish your work from other common 'picture postcard' winter scenes. Coverage up to 1.5 sq m.

WATCH THE VIDEO

Scenic Snow Kit

DBD29

For dramatic winter snow effects.

Complete kit containing high brightness **Snowflakes**, **Scenic Bond** adhesive and **Icy Sparkles** (available separately BD33). Covers up to 0.5m².

Icy Sparkles DBD33

Scenic Rust

RUST

DBD27 225ml

WATCH THE VIDEO

A three part system that puts a scale rust finish onto all types of paintable surfaces, wood, plastic, metal, within hours thereby creating greater realism for all types of modelling.

Scenic Shovelled Snow

DBD26 500ml

A unique type of snowflake developed for creating special snow effects. Ideal for piled snow along with snowballs and snowmen which are not possible with other types of snow. Mix with **Scenic Spray** glue or **Scatter Grip** and mould to shape.

- May be used on plastic, resin, metals etc.
- Non-corrosive & non-flammable.

Scenics

Scenic Fibres

DBD28

0.5 metre pack.

Scenic Fibres work with **Making Waves** to allow the easy and faster modelling of more realistic moving and white water eg. waterfalls, rivers. Forms a base onto which **Making Waves** can be brushed even down vertical surfaces in waterfalls.

Making Waves

DBD39 100ml

For creating waves, ripples, waterfalls and moving water effects. **Making Waves** is a 1-part, clear setting, water based low odour resin that holds its shape, even on vertical surfaces. It may be used to:

- Make shallow water effects eg. streams, puddles.
- Texture **Solid Water** surfaces with ripples and waves.
- Texture **Scenic Fibres** for waterfalls.

WATCH THE VIDEO for Making Waves, Solid Water and Scenic Water

Solid Water

DBD35 90ml
DBD36 350ml

A low odour, non-shrinking 2 part resin for simulating bubble free crystal clear water for miniature bowls, garden ponds, canals, lakes and puddles. Creates the illusion of deep water even with minimal thickness. Use it for still water (canals or lakes) in railway layouts.

Texture surface with **Making Waves** (BD39).

Scenic Water

DBD43 125ml

A re-meltable one part resin that pours, flows and sets as you want it. Best suited for small liquid projects eg. simulating drinks and many food items including jams particularly in enclosed containers. Melts at around 60C (140F). Avoid direct contact with metals - pre treat with lacquer.

Scenic Colours

DBD23

Pack of 5 colour dyes in dropper bottles for **Scenic Water** and **Making Waves**.

Ideal for making jams, drinks, jellies, custard, and blancmange etc.

Modeling Accessories

Pin Point Bottle Kit DAC10

For precision gluing. A small soft dispensing bottle ideal for minute application of water based glues such as **R/C Modellers Glue**, PVA glue and fluxes.

Ideal for many tasks where fine finger controlled gluing action is needed. It is supplied with a variety of three plastic and metal tips that are easily cleaned with water after use.

Pin Flow - Solvent Glue Dispenser DAC11

An applicator specially designed for the precise control of liquid solvent plastic adhesives such as **Plastic Magic**. When even a brush can sometimes deliver too much, this breakthrough device will deliver just the right amount of adhesive to bond the most intricate parts. Prevents glue runs. Creates invisible joints especially on clear plastic.

WATCH THE VIDEO

Spare needles available from www.deluxematerials.com

Pin Point Glue Syringe Kit DAC08

Pack of 2 dispensing syringes and 3 sizes of stainless steel needles for accurate application of water based glues:

R/C Modellers Glue (AD12), Speed Bond (AD10), Aliphatic Resin (AD8), Tacky Glue (AD27), Decorator Glue (AD26).
Easy to clean syringes and tips using warm soapy water.
Stop tips clogging by resting tips on damp sponge or in water.

Brush Magic DAC19 125ml

NEW

Brush Magic is a powerful, non-flammable brush cleaner for the rapid cleaning of all types of wet or dried paints from brushes. Use to remove wet PVA from wood for perfect staining.

- Washes away with water to a clean non-oily surface.
- Non-volatile & low odour.
- Dissolves acrylic, enamel and cellulose paints.
- Dissolves epoxy & polyester resins before they are set.

WATCH THE VIDEO

Strip Magic DAC22 125ml

NEW

A fast acting, spreadable, & controllable paint stripper that will soften and remove paints and primers, typically 5-15mins according to paint type.

- Softens and removes paint from plastic in minutes.
- Stays where it is applied.
- May be used on plastic, resin, metals etc.
- Non-corrosive & Non-flammable.

Brush Magic has been tested with:
All types of modelling enamels, acrylics, lacquers.
All types of brushes: sable, nylon etc.
Most types of airbrushes with Teflon or O-ring seals.
If decanting, use only glass or polythene containers.

Finishing Products

Perfect Plastic Putty

DBD44 40ml

Fills fine gaps. Creates invisible seams. Water clean up.

Perfect Plastic Putty is a one-part, fast-drying, superfine filler with good adhesion and sanding properties on plastic. Easily used, even in awkward areas with water clean up. Apply with small spatula, smooth and allow to dry.

Perfect Plastic Putty:

- Dries quickly without cracks to an ultra smooth finish.
- Fills deep cavities and takes paint easily.
- Low odour.
- Ideal for texturing.

Tip To minimise drying, expel air prior to replacing cap.

Eze Dope

DBD42 250ml

A specially formulated water soluble dope for shrinking, strengthening & wind-proofing model tissue paper. It is non-flammable, has little odour and dries rapidly to a semi-matt fuel proof finish. Use to apply tissue decoration to all types of foam.

Recommended by:

WATCH
THE VIDEO

Eze-Kote

DBD37 500ml

Laminating and finishing resin for balsa and foam models.

Eze-Kote is a 1-part water based, foam-safe, low odour resin alternative to epoxy. Brush onto balsa and light glass cloth to create a tough, ding and fuel resistant film that can be sanded easily and painted after 20-30 mins.

Coverage: 75ml covers approx 1m² / coat.

See
pages 14-15

WATCH
THE VIDEO

Foam Armour

DBD50 250g

- Creates a hard durable surface layer on foam and wood.
- Ideal for scenics, model aircraft etc.

A thick water based resin that sets to produce an attractive, durable, scratch resistant coating on foam to prevent dings, wear and disintegration. It dries to a surface that can be

painted and glued easily and will reduce damage.

- Easy to apply.
- Seals surfaces, gaps and foam edges to prevent disintegration.
- Can be over-coated or mixed with acrylic paint.
- Is easily glued and worked.
- Bonds grass and scatter materials.

250g pot covers 0.7 m² / 7 ft²

Finishing Products

WonderFill

DBD48 240ml

The next generation of strong lightweight fillers for foam and wood.

An easy sanding, strong, lightweight filler designed to fill small gaps and indentations.

Easily applied and smoothed with a damp finger and then sanded back. Does not crumble like other lightweight fillers and can be over-coated with Deluxe Materials **Foam Armour** (BD50) for improved surface toughness, and finish before being painted.

See page 15

Micro Balloons

DBD15 240ml

Lightweight, free flowing, white powder which is mixed with polyester or epoxy resin to make an easy sanding strong filler. Can also be used to create snow effects (smaller than 1:48 scale) with **Scatter Grip** glue (AD25).

Liquid Gravity

DBD38 240g

A non-toxic, easy flowing, weighting system for scale military models, railway rolling stock, model planes, boats and cars. Specially designed to pour into small cavities and set in place with your favourite

Rocket cyano (AD43-46), or **Speed Epoxy II**. Use to improve appearance of dolls house curtains, cushions, bedspreads, adjust balance point of model planes, boats & submarines. 50ml bottle weighs almost 0.25 kilo!

WATCH THE VIDEO

Sand 'n' Seal

DBD49 250ml

A specially formulated wood grain sealer.

Coats and seals wood grain prior to painting and finishing. Use with all types of paints including enamel, cellulose, acrylic or epoxy. Stir well before use.

Apply with brush and allow to dry. Sands beautifully after 60 mins. Clean brushes with water. Economical in use. Low odour and non-flammable. Covers 1.5 sq metres.

Smart Plastic

NEW

DBD63 125g

Heat mouldable modelling plastic. Melt & then mould in your hand.

A safe, white modelling plastic that is easily melted in hot water (40-60C /100-140F) to a soft consistency, ideal for hand moulding to any shape.

Smart Plastic sets in 3-4 minutes to a tough, flexible plastic that can be re-melted. It is highly versatile in use and ideal for: custom fabrication, impressions, masks, moulding, prototypes, design, craft, repairs, strengthening & filling plastics & other materials.

- Quickly cool enough to handle.
- Can be coloured with inks or acrylics.
- Setting is accelerated by cold water.
- Cut with metal cake cutters or scissors.

Plastics Adhesives

***CLEANER,
SAFER, EASIER***

New low odour formula plastic adhesive for invisible glue lines

- High solvency formula - one bottle for almost all plastics
- Less evaporation and smell for improved working conditions and less waste
- No more spillages with the sturdy, stable bottle
- Two high precision, long reach brushes for perfect joints

DAD77

Plastic Magic
Super Thin Plastic Adhesive
Sold By Each

Track Magic

DAC13 50ml

Track Magic is a special cleaning fluid for model rail and car tracks, electric contacts and wheels.

- Maximizes conductivity and reliability.
- Works in low power/ confined space situations.
- Revives old electric contacts and improves new ones.

Apply Track Magic using a soaked swab or supplied sponge or in tricky confined areas with the fine brush applicator supplied. Suitable for track cleaning vehicles.

WATCH THE VIDEO

new PRODUCTS FOR 2017

DAD78 Fix'n'Flex 40ml Clear, tough, resilient, gap-filling adhesive. Bonds foam, plastic & metal. Produces flexible bonds in ways that other glues cannot.

- Uses
- Foam models - construction and repairs
 - Bonding plastic servo trays & motor mounts into foam
 - Bonding plastic or carbon fibre stiffeners into foam
 - Securing plugs, leads & cables from vibration
 - Creating exhaust gaskets & sealing cable exits
 - Securing model railway track, street furniture, buildings & trees
 - Bonding wood & metal into plastic moulded boat parts

FIX'n'FLEX

DAD79 Body Armour 60g For reinforcing & repairing plastic model car bodies. Impact resistant & safe on paint. A highly flexible polymer adhesive designed for reinforcing & repairing model car bodies.

Will not attack most common model car paints.

BODY ARMOUR

STICKY MAT ADHESIVE

DAD80 Sticky Mat Adhesive 50ml

For holding, precise cutting & sanding of thin sheet material (craft paper, thin card, plastic covering film, vinyl, artwork, decals, plans, etc).

Remains tacky when dry & enables precise cutting, tiling or sanding.

DBD65 Aqua Magic 125ml For modelling realistic water. No mixing, safe & low odour. Light stable & highly reflective.

A 1-part solution for the scale modelling of water effects e.g. rivers, canals, lakes, ponds, puddles & mud.

Simply...

'Track Magic'

Cleans & protects track for maximum response & reliability

- works on digital & analogue low power/confined space situations.
- revives & protects old electric contacts & improves new ones.
- is safe on plastic, foam, acrylic & enamel paint.
- ideal for track cleaning vehicles.

Track Magic is a special cleaning fluid for model rail track, electric contacts & wheels.

Track Magic works by:

- setting up an invisible conducting film.
- resisting rust, wear, & corrosion to reduce track maintenance.
- dispersing oily contaminants to create a clean, conducting surface for smooth running.

DAC13
Track Magic
50ml

Apply Track Magic using a soaked swab or supplied sponge or in tricky confined areas with the fine brush applicator supplied. Suitable for track cleaning vehicles.

Plastic Magic

New Plastic Magic is a low odour super thin cement for invisible joints..

✓ **Bonds:** ABS, Styrene & plastics other glues cannot.

Boxed

Kit includes: 2 high precision long brushes.

Reaches every last drop.

Stable 40ml non spill bottle.

The new safer formula can be applied with the Deluxe Materials Pin Flow solvent glue applicator (DAC11) or conventionally with a fine paint brush. Plastic Magic bonds nearly all commonly used modelling plastics including polyester, acrylic, styrene, ABS, PVC, butyrate, and polycarbonate.

High strength across gaps.

Flexibility & vibration resistance.

Non-drip performance.

Extended set time (gels 3-4 hrs, 24hrs full cure).

Visibility in joints.

Resistance to aviation fuel and ester based synthetic oils.

Superior wetting characteristic enabling the bonding
of a wide range of materials including composites,
hardwood & metal.

As conventional epoxy adhesives are not suitable for many tasks in modern jet model construction, Deluxe Materials has taken pride in producing this **AERO TECH** product range - the latest innovation especially designed for bonding composite mouldings and is a non-drip epoxy for strong visible joints, so you can get best results.

PHOTO 1. The Deluxe Materials **AERO TECH** dispenser gun is especially for use with the 50ml **AERO TECH** cartridge & nozzles. The 50ml cartridges are easily slid into place & the trigger action facilitates easy extrusion of epoxy.

PHOTO 2. Bonding in Formers. Applying ready mixed **AERO TECH** epoxy right to where it is wanted is easy with the 8cm nozzles. It is non-drip & visible when applied. Working time can be extended for 2-3 hours by storing nozzles in the freezer.

PHOTO 3. The self-mixing 25ml **AERO TECH** syringe for small jobs such as fixing control horns, undercarriages, servo mounts etc. The syringe dispenses epoxy resin & hardener in equal parts ready for thorough mixing.

Deluxe Materials - It's much more than an adhesive company .. it's about being passionate & committed to finding new & better solutions to modelling tasks.
